

# Diadrain MP

## Microporous Flat Vacuum Channel

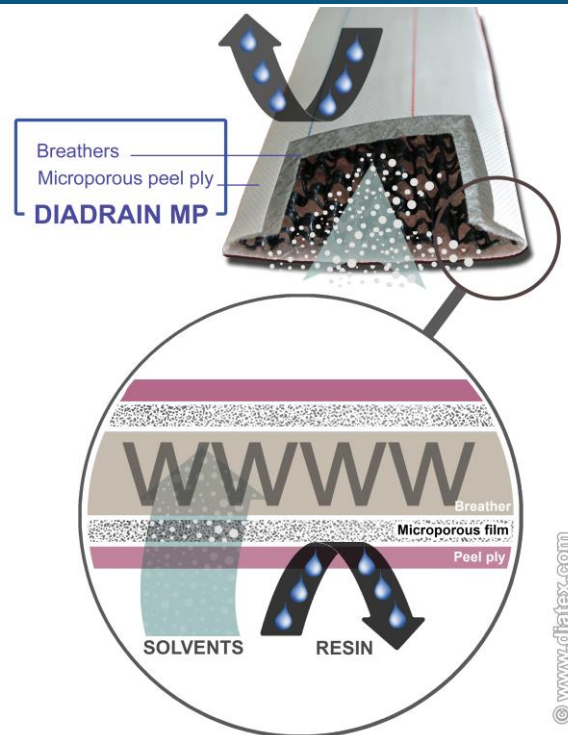

### DESCRIPTION

**DIADRAIN MP** is a microporous flat vacuum channel. **DIADRAIN MP** is placed around the mold instead of the spiral pipe: when the resin reaches **DIADRAIN MP**, it will stop meanwhile the gas is still eliminated from the laminate.

**DIADRAIN MP** can also be set at any place on the laminate. Use with our special connectors and tape to seal ends.

#### Advantages:

- No marking on the laminate: no printed mark
- Minimize the resin waste
- Lowers the number of dry spots
- Minimize material consumption
- No catch pot / resin trap necessary
- Easy to set

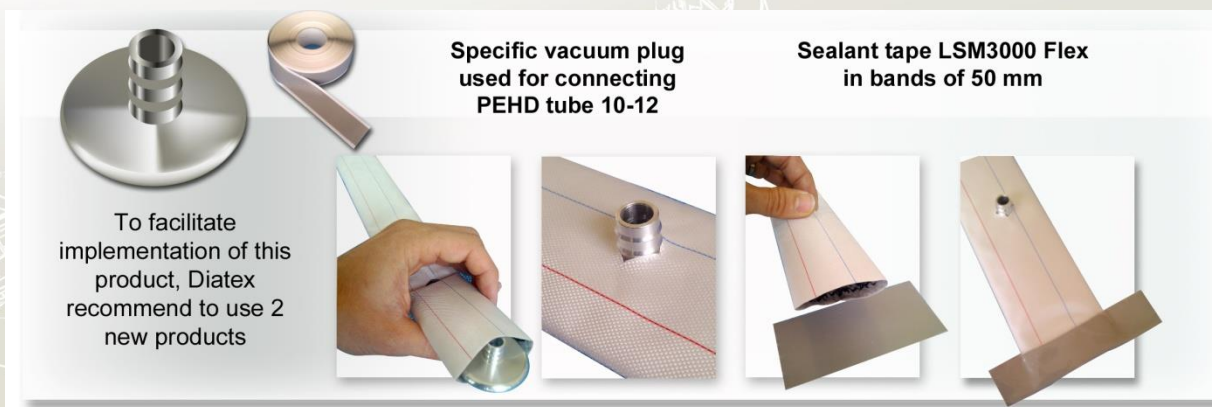

### STORAGE

Store DIADRAIN MP at room temperature and normal hygrometry.

### CHARACTERISTICS / PRESENTATION

Color	Release	Max. Serv. Temp.	Thickness	Width	Weight	Length
