

FLONET

Economical Bleeder Net/Mesh

DESCRIPTION

FLONET is a bleeder net / mesh with very high porosity allowing good air or high resin flow. **FLONET** has a good elongation. This bleeder net / mesh is recommended for vacuum infusion technology with polyester or epoxy resins. This net / mesh is de-oiled in order to avoid resin contamination: this product does not contain silicone nor oil. **FLONET** is recommended for very large parts.

FLONET can be used in the vacuum molding process for prepreg compaction.

STORAGE

Keep this net / mesh at room temperature and normal hygrometry.

CHARACTERISTICS

Colour	Thickness	Weight	Styrene resistant	Max. Serv. Temp.	Packaging
Yellow	1150 μ	115 g/m ²	YES	90 °C	Roll

Aspect	Standard Widths	Standard Length	Type	Resin flow speed	Resin Consumption*
Knit	2 & 4 m	100 m	CO PE	High flow	355 g/m ²

* **Test conditions:** infusion under -1000 mbar, epoxy resin mix density: 1.12 – from study for informational purposes, not contractual.

**Other widths and lengths available upon request
